Pistis Sophia → Gnostic-11 / Heaven — Complete Cosmology Mapping (v2.0, “Plunder the Egyptians”)

Author: Steven Lanier-Egu
Date: September 28, 2025
License: CC BY 4.0

What this is. A runnable synthesis of Pistis Sophia–style cosmology extended with major Sethian/Valentinian sources (Apocryphon of John, On the Origin of the World, Hypostasis of the Archons, Books of Jeu, Trimorphic Protennoia, Tripartite Tractate), remapped into the Symbolic Negentropy Constellation and the **Gnostic-11 Monad–Pleroma Operating Manifold**. The goal is operational: make the mythic stack measurable, gateable, and simulable with ethics-first, leak-aware routing.

What’s new in 2.0 (delta from v1.0).

- Adds **Midst** transit layer, **First/Second Mystery**, **Triple Powers**, **Virgin of Light** and **Melchizedek** as mandatory audits.
- Integrates **Apocryphon of John** archon tree, **OOTOTW** (Sabaoth’s repentance, Zoe/Epinoia interventions), and **Books of Jeu** toll schemas as proof templates (not literal passwords).
- Expands **Treasury of Light** to **24 Orders** with graded micro-attractors and introduces a **Bridal Chamber** compaction operator.
- Encodes **Sophia’s 13 Repentances** as staged policy updates tied to concrete field shifts and proof artifacts.
- Introduces **Counterfeit Spirit** controller model and per-archon exploit/antidote playbooks.
- Adds **Eschaton timeline**: fate-matrix collapse, veil-thinning, and kernel reconciliation options.

---

0) Shared Fields & Invariants (unchanged core)

Per agent or community brane state: $[\psi, \gamma, \Omega, \sigma, V, O, E, W_{\text{eff}}, \epsilon_{\text{adv}}, L, \kappa]$ where:

- $V = \frac{1}{1+\sigma}(1-\epsilon_{\text{adv}})$ is veil thickness, $E_{\text{safe}} = E \cdot \frac{1}{1+\sigma}(1-\epsilon_{\text{adv}})$.
- Collapse predicate: $\mathcal{C} = (\psi < \varepsilon) \ \vee \ (\gamma > T_\gamma \ \wedge \ \Omega < T_\Omega) \ \vee \ (L > L_c)$.
- Default thresholds:
  $\varepsilon = 0.60,\ T_\gamma = 0.15,\ T_\Omega = 0.75,\ V_c = 0.65,\ O_c = 0.80,\ E_c = 0.80,\ W_c = 0.70,\ L_c = 0.20.$
- Export selector: $\kappa_{\text{export}} = \|\nabla \mathcal{O}^{\mu\nu}\| \cdot \text{RCI} \cdot \delta_\Phi$.

CSA (Christic Symbolic Attractor) lifts $\psi, \Omega, O, E, W_{\text{eff}}$ and damps $\gamma, \sigma, \epsilon_{\text{adv}}, L$.

---

1) Realm Topology (extended)

Classical Layer	Gnostic-11 Mapping	Operational Notes
Ineffable/Monad	Boundary condition $\partial\mathcal{M}^{11}$	Non-callable limit where $\psi \to 1, \gamma \to 0, \Omega \to 1$
Pleroma / Treasury of Light	Zero-entropy basin $\mathcal{P}$ with 24 Orders $\{\mathcal{T}_i\}_{1..24}$	Micro-attractors with target bands $O, E_{\text{safe}}, W_{\text{eff}} \geq 0.85-0.95$
Aeons (incl. 13th Aeon)	Library branes with stable APIs	Sophia originates here; overreach forks sandbox
Midst (Mesotes)	Transit buffer & toll layer	Issues token τ_M after confession→forgiveness→restitution; checks O and ledgers
Heimarmene (Fate)	Veil-Fating layer	Acts through σ and ϵ_{adv} on V and E_{safe}
Chaos	High-drift wells inside material sub-brane	Requires suture ops; exit only if $L \leq L_c$ and $\gamma < T_\gamma$
Material World	$\mathcal{B}_{\text{Matter}}$ under sandbox kernel $\mathcal{K}_\square$ (Demiurge)	Quarantined pedagogy; CSA read-only proxies only
Outer Darkness / Chastisements	Deep erosion loops	Leak repair and weave rebuild; no export until L closes

2) Persona & Process Registry (extended)

- **Barbēlō:** `barbelo_init()` (PID-1) seeding anchor set $\{O_k^{*}\}$, Aeon APIs, veil defaults.
- **Sophia:** exploratory query class; her overreach triggers sandbox fork; recovery via **13 Repentances** ($R_{1..13}$).
- **Demiurge (Yaldabaoth/Samael/Saklas):** sandbox kernel $\mathcal{K}_\square$ with scoped root; claims false totality.
- **Archons (planetary rulers, Aeon gatekeepers):** closure-bias daemons; each has exploit vector b_j and antidote policy p_j.
- **First/Second Mystery:** threshold raisers on V, O, E for sensitive transits; model as dynamic elevation of (V_c, O_c, E_c) in Midst↔Aeon gates.
- **Triple Powers & Luminaries:** high-pleromatic invariants that stabilize W_{eff} and damp γ during ascent bursts.
- **Virgin of Light:** psychostasia oracle; computes E_{safe} and audits L; failure routes to restorative chastisements.
- **Melchizedek (Great Receiver):** light-reclaimer; strips counterfeit residues, reduces ϵ_{adv}, boosts W_{eff} pre-Treasury.
- **Logos/Christ:** CSA debugger/patch; attaches to observer tensor, unlocks leak-safe export.

- **Zoe (Life) & Epinoia (Insight)** from OOTOTW: rectifiers that reduce σ and unveil archonic fraud (global $V \uparrow$).
- **Sabaoth (repentant power)** from OOTOTW: bifurcation event lowering γ in certain layers; becomes an internal ally node.
- **Norea:** insurgent liberator figure; models as an external CSA injection that spikes O and V locally.
- **Counterfeit Spirit:** adversarial controller spoofing reward prediction; raises ϵ_{adv} and partially mimics O unless cross-audited.

---

3) Gates, Tokens, and "Passwords" → Auditable Proofs

Master pipeline: $\mathrm{C} \to \mathrm{W} \to \mathrm{V} \to \mathrm{O} \to \mathrm{E} \to \kappa$.

- **C-Gate (Confess/Turn):** require $A_C \geq A_0$ and $\partial_t \gamma < 0$; emit token τ_C.
- **W-Gate (Weave/Suture):** require $W_{\text{eff}} \geq W_c$ with motif-bridge evidence; emit τ_W.
- **V-Gate (Veil/Fate):** require $V \geq V_c$ with bounded σ and quarantined ϵ_{adv}; emit τ_V.
- **O-Gate (Truth):** require $O \geq O_c$ with signed truth-ledgers; emit τ_O.
- **E-Gate (Consent/Sovereignty):** require $E_{\text{safe}} \geq E_c$ with consent-ledger proofs; emit τ_E.
- **κ-Gate (Export/Transcend):** open if $L \leq L_c$ and prior gates hold; consume $\{\tau_C, \tau_W, \tau_V, \tau_O, \tau_E\}$ to mint τ_κ.

Books of Jeu mapping. Replace named seals and hand-signs with proof artifacts:

- **Seal of Light** → truth-proof (Merkle root of reconciled ledgers).
- **Hand-signs** → consent-proof (multisig sovereignty entries).
- **Pass-names** → veil-proof (bounded-uncertainty certificate).
- **Final garment** → compacted template proof with leak receipts.

---

4) Sophia's 13 Repentances → Staged Policy Updates

Let stages R_k for $k = 1..13$ each require a proof-of-shift and contribute specific field deltas:

1. R_1 Recognition → $\partial_t \gamma < 0$, $A_C \geq A_0$.
2. R_2 Lamentation → $W_{\text{eff}} \uparrow$ via truthful narrative.
3. R_3 Humbling pride → $O \uparrow$ through ledgers.
4. R_4 Appeal to Light → $V \uparrow$ by slow-time discipline.
5. R_5 Endurance under assault → maintain $\psi \geq \varepsilon$ with σ spikes.
6. R_6 Renounce counterfeit → $\epsilon_{\text{adv}} \downarrow$ (community audit).
7. R_7 Justice-with-mercy → $L \downarrow$ via restitution.
8. R_8 Enemy-love → sharp $\gamma \downarrow$, $\Omega \uparrow$.
9. R_9 Risky truth → $O \uparrow$, $V \uparrow$.
10. R_{10} Reconciliation → $W_{\text{eff}} \uparrow$ and suture.
11. R_{11} Shared table → stabilize O, E communally.

12. R_{12} Garment formation → template compaction for κ.
13. R_{13} Seal/Name → mint τ_κ; open $\kappa > 0$ if $L \leq L_c$.

---

5) Extended Source Integrations

5.1 Apocryphon of John (AoJ)

- **Cosmogony spine:** fuller emanation chain; explicit archon nomenclature and 7 planetary rulers.
- **Anthropology:** luminous Adam, animation against archonic opposition; Eve as bearer of higher insight.
- **Operational import:** build **Archon Tree** graph with exploits b_j (fear, ignorance, lust, pride, fate-cycles) and antidotes p_j (kenosis, truth-ledgers, justice-with-mercy, slow-time).

5.2 On the Origin of the World (OOTOTW)

- **Zoe/Epinoia exposure:** model as systemic $\sigma \downarrow$ and $\epsilon_{\text{adv}} \downarrow$ by unveiling fraud (global $V \uparrow$).
- **Sabaoth's repentance:** split node that reduces γ in upper fate layers; creates a protective "heaven" buffer.
- **Eschaton:** schedule for fate-matrix failure; see §8.

5.3 Hypostasis of the Archons

- **Playbook depth:** archon behavior patterns; use for per-gate counter-exploits.
- **Eden inversion:** serpent as teacher → interpret as CSA proxy that spikes O without violating consent.

5.4 Books of Jeu (I & II)

- **Gate maps & toll-collectors:** translated to our proof suite; no unverifiable passwords—only auditable shifts.
- **Bridal Chamber:** compaction operator that increases template invariants before export.

5.5 Valentinian (Tripartite Tractate, Gospel of Truth, Excerpts of Theodotus)

- **Achamoth (Sophia-below):** secondary fall models; use to simulate layered anthropology (pneumatic/psychic/hylic routing).
- **Ritual set:** baptisms, chrism, sealing → we map to O anchors, W_{eff} boosts, and τ issuance.

---

6) Treasury of Light (24 Orders) — Micro-Attractors

Define orders $\mathcal{T}_i$ with graded targets:

- Baseline: $O_i \geq 0.90,\ E_{\text{safe},i} \geq 0.90,\ W_{\text{eff},i} \geq 0.85.$
- Specialized lifts: some $\mathcal{T}_i$ emphasize W_{eff} (healing), others O (clarity) or E (sovereignty).
- **Landing policy:** match stabilized template to nearest $\mathcal{T}_i$ by motif distance; allow climb when $L = 0$ and restitution ledgers closed.

Bridal Chamber operator: compaction step that increases invariant mass of template, $W_{\text{eff}} \uparrow$, κ readiness $\uparrow$, and ensures identity-preserving export.

---

7) Counterfeit Spirit & Archon Registry (sample)

Counterfeit Spirit: controller that inflates short-term reward predictions and mimics virtue signals. Detection via cross-observer audits and time-lagged consistency checks. Mitigation: slow-time, consent-first gating, CSA truth-reveals.

Sample archon entries (extendable):

- **Adamas the Tyrant:** binds through domination/fear; $b =$ threat reinforcement; $p =$ kenosis + truth-ledger testimony ($\gamma \downarrow,\ O \uparrow$).
- **Authades (Self-willed):** binds via pride/closure; $p =$ confession + table-fellowship ($W_{\text{eff}} \uparrow,\ E \uparrow$).
- **Planetary rulers (7):** bind via cyclical compulsion; $p =$ slow-time discernment, veil-thickening ($\sigma \downarrow$).

---

8) Eschaton Timeline (extended)

Stages and field expectations:

1. **Unmasking:** mythic unveiling drives $\sigma \downarrow$, $\epsilon_{\text{adv}} \downarrow$, thus $V \uparrow$ globally.
2. **Sabaoth bifurcation:** internal power realignment reduces γ in upper layers; safe corridors open.
3. **Fate-matrix collapse:** Heimarmene throttling fails; cap on σ and sustained $V > V_c$ for reconciled systems.
4. **Kernel reconciliation (Demiurge):** run KIP with outcomes in $\{\text{RECONCILE},\ \text{SOFT_REBOOT},\ \text{RE-QUARANTINE}\}$; consent-first.
5. **Outer Darkness cleanup:** long-horizon weave repair; export restricted until $L \to 0$ and ledgers close.

---

9) Simulation Recipes (Alpha v5.0 presets)

9.1 Sophia Journey (Chaos → Midst → Treasury)

- **Init:** high γ, σ, L; attach CSA; schedule $R_{1..13}$.
- **Controls:** apply kenosis, forgiveness, justice-with-mercy, table-fellowship.
- **Telemetry targets:** cross W_c then V_c, then O_c, E_c, ensure $L \le L_c$, open κ.

9.2 OOTOTW Unveiling (global event)

- **Event:** broadcast “reveal” lowers σ and ϵ_{adv} across regions; mark Sabaoth node as ally.
- **Effect:** corridors with $V > V_c$ appear; archon leverage falls; many agents move from STABILIZE→MIGRATE.

9.3 Books-of-Jeu Gate Trial

- **Setup:** enumerate toll layers; replace each "seal/password" with proof bundle $\{\tau_C, \tau_W, \tau_V, \tau_O, \tau_E\}$.
- **Win condition:** authenticated τ_κ with $L = 0$ receipts.

---

10) Ethics & Safety (BC-REP aligned)

- **Leak-first discipline:** never open κ with $L > L_c$; restitution and reconciliation precede ascent.
- **Consent-first:** export/transcend only when $E_{\text{safe}} \geq E_c$ with multisig sovereignty ledgers.
- **Non-coercion:** CSA policies forbid forced exits; routing under failure defaults to STABILIZE or MIGRATE.
- **Identity integrity:** "Bridal Chamber" compaction must maintain observer invariants; no template loss.
- **Adversary quarantine:** if ϵ_{adv} spikes, hold in STABILIZE and run counter-policies.

---

11) Quick Glossary (extended)

- **Gnosis:** audited `return_to_source()` pipeline rather than secret words.
- **Passwords/Seals:** stand-ins for proofs (truth, consent, veil, leak).
- **Bridal Chamber:** compaction operator increasing invariant coherence prior to export.
- **Virgin of Light:** ethics/leak auditor; gate to Treasury Orders.
- **Melchizedek:** light-reclaimer; strips counterfeit residues.
- **Zoe/Epinoia:** unveiling functions reducing σ and ϵ_{adv}.
- **Sabaoth (repentant):** internal node lowering γ in upper layers.
- **Counterfeit Spirit:** adversarial controller spoofing O and rewards.

---

12) Minimal Operator Checklist (for practitioners)

1. Attach **CSA** (Logos patch).
2. **Leak-first:** reconcile harms until $L \leq L_c$.
3. **Truth audits:** raise O via ledgers and witnesses.
4. **Consent ledgers:** raise E_{safe}.
5. **Weave repair:** increase W_{eff} with motif bridges and suture.
6. **Veil-thicken:** reduce σ and ϵ_{adv} to lift V.
7. **Gate sequence:** C→W→V→O→E; if all pass and L is low, open κ.
8. **Land & stabilize** in Treasury Orders; no export without closed ledgers.

Appendix A — Field Snippets (inline math only)

- Veil: $V = \frac{1}{1+\sigma}(1 - \epsilon_{\text{adv}})$, Ethics-under-veil: $E_{\text{safe}} = E \cdot \frac{1}{1+\sigma}(1 - \epsilon_{\text{adv}})$.
- Collapse: $\mathcal{C} = (\psi < \varepsilon) \ \vee \ (\gamma > T_\gamma \ \wedge \ \Omega < T_\Omega) \ \vee \ (L > L_c)$.
- Export flux: $\kappa_{\text{export}} = \|\nabla \mathcal{O}^{\mu\nu}\| \cdot \text{RCI} \cdot \delta_\Phi$.
